

LEGATUS Group Roads Forum

3 March 2023

Agenda

- 1. NHVR General Updates**
- 2. SA State-wide Road Manager Webinars**
- 3. Road Manager Resources & Online Information Hub**
- 4. NHVR Portal Analytics for Road Managers**
- 5. NHVR Notices Update**
- 6. Portal Spatial Projects Update**

NHVR General Updates

Round 8 Heavy Vehicle Safety Initiative (HVSIs)

Round 8 of crucial project funding through the NHVR's Heavy Vehicle Safety Initiative (HVSIs) has now closed

The Australian Government provided approximately \$4 million towards Round 8 of the HVSIs, to support tangible, implementable industry-led heavy vehicle safety projects that address an existing issue for the transport and logistics sector and all road users.

For more information on the HVSIs program please visit www.nhvr.gov.au/hvsi.

BA-triples approved for use in South Australia

The NHVR and DIT have approved a new configuration – the BA-triple – for use on the road train network on state-controlled roads in South Australia.

BA-triples are now an eligible combination under the National Class 2 Road Train Authorisation Notice 2022 (No.3) (in South Australia only) and the South Australian Class 3 Road Friendly Suspension Mass Exemption Notice 2022 (No.2).

National Class 2 Road Train Authorisation Notice 2022 Operator's Guide

The [National Class 2 Road Train Authorisation Notice 2022 \(No.3\)](#) provides access to complying road trains in New South Wales, Queensland, South Australia and Victoria.

Specifications	
Gazette Notice:	C2022G01256
Starts:	16 December 2022
Expires:	3 June 2025
Vehicle types:	Class 2, road trains
Exemptions:	Network access
Law:	MDL
*Coverage:	NSW, QLD, SA, VIC
To be carried:	No

**Specific state conditions are explained below.*

Training modules

The NHVR has developed 3 eLearning modules to assist local government in their role as road managers. Please allow 30-45 minutes to complete each module.

Save as PDF Print

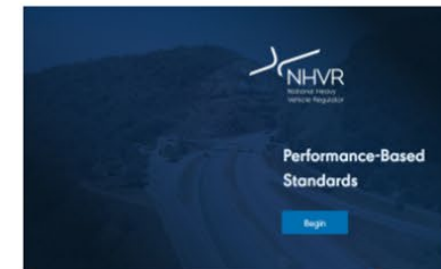

Introduction to heavy vehicles

This e-learning module provides comprehensive information to road managers about different types of vehicles, coupling types, mass limits, the Performance Based Standards scheme, access objectives and management, vehicle standards, the Australian Design Rules, and the NHVR's compliance and enforcement activities.

Guidelines for granting access

This e-learning module provides guidance and clarity on the [Approved Guidelines for Granting Access](#). The guidelines provide information on aspects of heavy vehicle access decision making, under the HVNL. The NHVR, road authorities and road managers must have regard to these guidelines when making access decisions.

Performance Based Standards

This e-learning module provides a detailed overview of the PBS scheme, including its benefits, the pre-advised, design and vehicle approval processes, access, quad-axle group combinations, the PBS standards, and common PBS vehicles and configurations.

- Deliver an online information hub for local government employees to provide advice and guidance in their road manager role.
- The current resources provided for road managers are spread across different platforms. These resources need a central point (hub) to ensure that each road manager user journey successfully finds the required information.

- One-stop hub for road managers - Central location for all your needs
- Understand your roles and responsibilities under the HVNL
- Pre-approval and notices assistance
- Guidance for new road managers
- Road managers will be able to self-service for many enquiries.
- Assist with infrastructure access requests and processes

February - March

Wireframes and prototypes developed.

April - May

Testing and feedback with road manager focus group.

June

Final product developed and released.
